New Product

ALCA. Innovation in the pre-wall installation systems.

EASIER AND FASTER INSTALLATION TO THE WATER SUPPLY

Innovative cistern with a new all-in-one angle valve Shell.

EASY LOCK – A SET FOR WALL MOUNTING

Faster and easier installation
New construction solution allows an easy mount of the frame to a wall in half the time.

Exact setting
Optional additional adjustment to an optimal position using an allen key accessed via the front of the frame.

NEW CISTERN HANGING CLIPS WITH TWO-COMPONENT INSULATION

Anti-noise solution/insulation
Thanks to the two-component material, the transmission of vibrations from the attachment between the cistern and the frame is isolated. It is compatible with all standard ALCA modules (with the exception of Slim frame).

1 PIECE CISTERN

Guaranteed impermeability:
The water cistern is made in one piece, which ensures its absolute impermeability.

100% control:
Tightness of each cistern is controlled by air pressure.

Quality material:
Polyethylene (PE) – ensures long-term stable characteristics and durability.

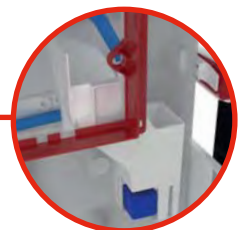

WC TABLETS DISPENSER

Perfect hygiene of the WC bowl

Discreet hygienic solution for all types of ceramic WC bowls. Also ideal for rimless WC bowls.

100% compatibility

It is compatible with all standard ALCA modules (with the exception of Slim), inclusive of older WC systems.

NEW FILL VALVE

Silent, fast, exceptionally durable.

Specially developed for the pressure range of 0.5–16 bar. Exceptionally resistant to impurities in water.

Extended warranty of six years.

NEW FEET LOCK SYSTEM

The feet lock system enables the setting of the necessary building height of the frame profile and then you ensure its final position by tightening. This eliminates the need for the assistance of another person during the installation and also increases the accuracy of the installation.

Dispenser for inserting of WC tablets

- Included with each ALCA WC system*
- Discreet toilet freshener
- Hygienic cleanliness of the WC bowl
- Easy operation with the tiltable flush plate mechanism
- Suitable for all types of WC cistern tablets

*(With the exception of the Slim WC frame).

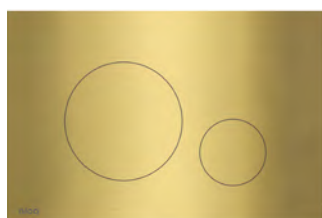

TILTING MECHANISM FOR EASIER INSERTION OF WC TABLETS

- Included with THIN, FUN, TURN and MOON flush plates.
- They are fully compatible with all ALCA pre-wall installation systems.

Flat Series

**Metal plates.
Timeless look.
Premium materials.
Flawless operation.**

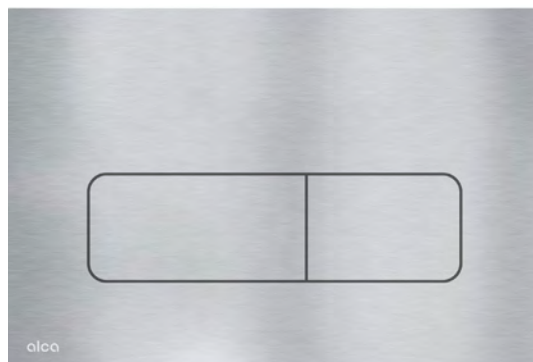

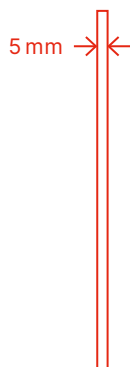

Anti-fingerprint

The surface of the FLAT flush plates have a special protective layer, which does not show smears or finger marks. Due to this protective layer, the flush plates do not require frequent maintenance or cleaning thus greatly extending their lifetime.

Antibacterial layer destroys unwanted micro-organisms

That's why we have developed a wide range of products with surfaces covered with a film that guarantees an immaculately sterile environment. Silver nanoparticles prevent the spread of unwanted microorganisms. In combination with antibacterial pans and seats, you can create an environment that does not allow bacteria to multiply.

Thin Series

Unique thin plates.
5mm in thickness.
Slick appearance.

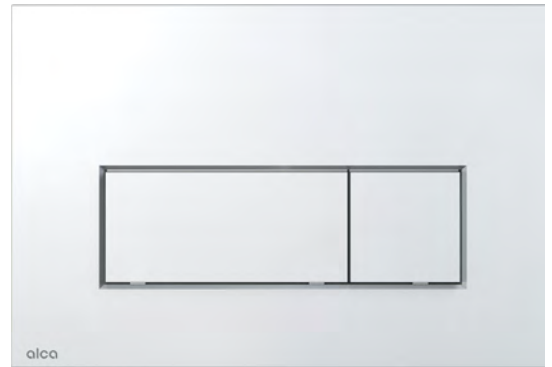

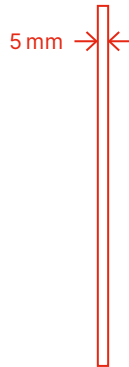

Antibacterial surface treatment

The surface finish of matt THIN flush plates contains silver nanoparticles which prevent the spread of unwanted micro-organisms.

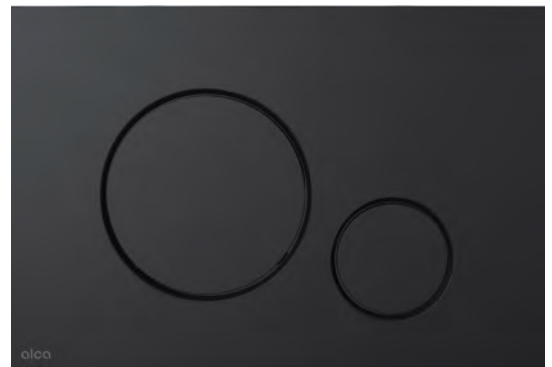

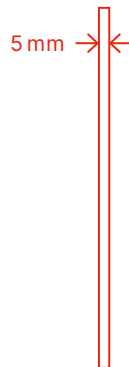

Flush plates with tilting mechanism

Frames for selected flush plates in the THIN range have an added tilting mechanism for easier flush plate removal. In combination with a tablet dispenser, included in each WC module, it creates a system of even better hygiene of your lavatory.

Only 5 mm

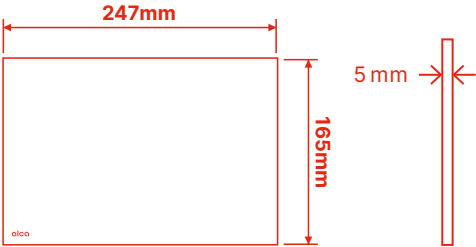

Introducing the new THIN flush plates, which thanks to its flat profile stands out only five millimetres above the tiles. This guarantees a perfect and discreet blend with the rest of your toilet or bathroom. In combination with pre-wall installation systems, SLIM saves extra centimetres in the toilet space.

8 colour variants

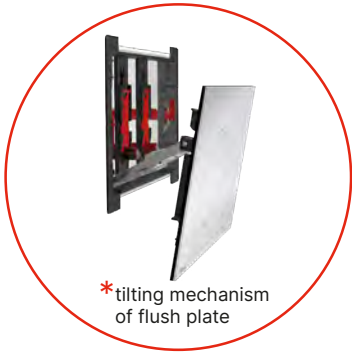

THIN is available in three designs and 8 surface finishes – polished-chrome, polished-white, matt-chrome, matt-black, matt-nickel, matt-gun, matt-gold and matt-red-gold. Both square and round designs ensure that you can achieve clean lines, a precise finish and silent operation.

Unique PVD technology

The luxurious high quality surface finish on PVD products is created by the application of a very thin layer of a special coating that merges with the base material at the atomic level.

Made of the highest quality materials

The result is increased durability and longevity of the product, as well as an elegant look. Either in a super-polished finish or in a brushed option with a more pronounced texture. Both variants are available in four colours.
