Operating Pressures

All Zucchetti products are designed to be used in conjunction with high pressure systems. Pressurisation can be achieved using unvented systems, pumped installations, or in some cases combination boilers. Depending upon the products specified, whilst some products will work at pressures as low as 1 Bar, in an ideal situation, an operating pressure of 3 Bar will allow for any specification of products to function effectively. Particular attention should be paid in situations where shower configurations with multiple outlets are used, especially if these are required to operate simultaneously, and certainly if operating below 3 Bar.

ZUCCHETTI. MADE IN ITALY

Founded in 1929 by Alfredo Zucchetti, Zucchetti Rubinetteria S.p.A is today at the head of a leading industrial group based in northern Italy, which includes Omez S.p.A, Zucchetti Mario S.p.A and the Kos brand.

90 years of experience and a commitment to constant innovation enables Zucchetti to continue to create iconic contemporary brassware collections. Its imaginative and stylish range ensures that there will be a Zucchetti design-led tap for every modern bathroom application.

Each collection is the result of advanced product development and sophisticated production processes. The production design cycle, which culminates in the industrialisation of the finished product, is carried out entirely within ZUCCHETTI's own factories in Italy.

ZUCCHETTI products are certified in accordance with UNI EN ISO 9001 standards and other key international quality marks. Zucchetti products have gone through KIWA certification, and in the UK our key collections have been/are being continuously submitted for KIWA approval. UK water authorities recognise both WRAS and KIWA certifications. Products already approved are indicated by the logo

ZUCCHETTI. HIGH QUALITY AND SUSTAINABLE DESIGN

Innovation, design and quality are the cornerstones of Zucchetti's philosophy.

Zucchetti collections have been designed to be long lasting. Our products are rigorously tested to the highest standards, both in-house and by external laboratories. The production process is tightly controlled from start to finish in our factories. Major resources are being invested to make sure that both the production process and equipment are state of the art, which in turn guarantees that the quality of products is consistent and to the highest quality. As a result, we are offering a 10 year guarantee on parts and 5 years on cartridges against any manufacturing defects in our products. Our mixers and shower systems have been designed with water consumption in mind and they feature in-factory restrictors that deliver a reduced water flow, without compromising user comfort and experience.

ZUCCHETTI. AWARDS

We believe in original ideas. Our company has always had innovation in its DNA: experience and industrial know-how developed in almost 90 years of history enable us to turn ideas into unique, cutting edge projects and products, awarded with the most prestigious international design prizes.

These represent a great recognition and gratification for the passion and commitment that inspire our everyday work.

Gill

With its clean, essential design, Gill strikes the right balance between different interlocking cylindrical elements: the body, spout and lever are defined by varied circular sections with delicate, original curves.

The Gill line is composed of single-lever mixers and other items that are characterised by their simplicity and adaptability, ideal for contract projects and bathrooms both large and small.

Brim

Reassuring and essential, the award-winning Brim collection stands out for its compact design that uses a single lexicon to elaborate two different shapes, the circle and the square.

Designed by Ludovica+Roberto Palomba Brim is the synthesis of an industrial design project that began with the Soft mixer and has evolved according to ever-modern canons, managing to tune opposing geometrics to achieve perfect shapes.

By Ludovica + Roberto Palomba

On

On is a complete collection of singlelever mixers that harmoniously combine different forms in an interesting mix of cylindrical bodies and rectangular spouts.

The slender levers further define the mixers, flexing downwards and echoing the shape of the spout. Drawn by Nespoli e Novara, On is an original, versatile collection that does not give up on the originality of design.

Available finishes:

Chrome

Nespoli e Novara

Basin mixer with high spout (ZON597) in Chrome.

for exposed mixer.

HOOK Z93782 chrome **£20.00**

ABS handshower support,
for exposed mixer.

Nikko

The aesthetic power of Nikko is expressed in an unusual contrast between the straight, essential lines and the soft, round shapes that coexist in the different versions of this single-lever mixer. Compact, practical and elegant, it was designed to combine impeccable style with efficient, sustainable industrial production. To that end, Nikko is made from brass with a low lead content, and devices that control and limit the water flow.

Simply Beautiful

Characterised by decisive, punctual style, this collection of 'simply beautiful' single-lever or three hole taps designed by Matteo Thun with Antonio Rodriguez stands out for its essential look and overall adaptability. Aesthetic requirements are on equal footing with the need to create an affordable, versatile product. They coexist with the desire to open up to an ever-larger consumer base, reaching more people without sacrificing the quality or visual impact of the product.

ZUCCHETTI. CLEANING

It is recommended to clean taps with soap and water by using a soft cloth, paying particular attention to surfaces different from chrome finishes, that are more delicate.

Do not use detergents containing hydrochloric acid or abrasive substances.

Traces of calcareous deposits in the aerators or on the chrome surface of the taps can be easily removed by using Zetabrill (art. R99993).

Plastic parts must be cleaned only with soap and water by using a soft cloth.

In the UK Zucchetti products are distributed by Farmiloe and Farmiloe (WBS Ltd)
